Executive Summary

This Environmental Site Assessment Screening has been completed for a portion of the Eastern Corridor Multi-Modal Project known as Segment II/III, which extends from approximately US 50/Wooster Pike in Hamilton County, Ohio to Bells Lane in Clermont County, Ohio, and includes a shared highway/rail transit corridor that extends from US 50 to the Ancor area east of Newtown, Ohio.

Through on-site visual inspection and a review of historic aerial photographs, USGS maps, Sanborn Fire Insurance Maps, and Regulatory Database search information, a total of 88 facilities and one ERNS spill site (on approximately 213 study area parcels) were determined to have hazardous materials concerns and warrant further study if impacted. Of these, 40 facilities and the one ERNS site (on approximately 119 study area parcels) occur within or immediately adjacent to the preliminary alternative corridors currently under consideration for this project, and are recommended for further study at this time. The 41 total facilities/sites recommended for further study are summarized below:

Parcel 146	Crest Craft, Inc., Crest Craft, Velvasheen Manufacturing Co., NoRave Properties LLC/Commercial (designers and manufacturers of custom emblematic award and recognition products); 3860 Virginia Ave.; Regulatory Database Records, RCRA-CESQG, FINDS, MANIFEST; Visual Concern Due to Operation Type,
Parcel 145	Just Blau Mit Weiss (BMW Automobiles Parts and Service)/RH Towing Service Auto Repair and U-Haul (3700-3702 Red Bank Rd. identified in Database Report as Swallens Complex, Brandell, Inc., Swallens, Inc., Red Express), 3700 to 3702 Red Bank Rd.; Regulatory Database Records, UST, LUST, FINDS, SPILLS; Visual Concern due to Operation Type, and the presence of AST's Drums, Surface Stains, Sheens,
Parcels 142-144	Suite A - Pack Rat Portable Storage and Moving, Suite B - Hamilton Co. Bd. of Elections and Suite C - vacant (3600 Red Bank Rd. identified as Johnson and Hardin Co., Quebecor World Red Bank Div., Johnson and Hardin CoWorld Color); 3600 Red Bank Rd.; Regulatory Database Records, RCRA-NonGen, SPILLS, FINDS, ICIS, No Visual Concerns at the Time of the On-Site Investigation,
Parcel 139	Ooten Interior Systems, 3555 Red Bank Rd.; Regulatory Database Records, RCRA-SQG, FINDS; No Visual Concerns at the Time of the On-Site Investigation,
Parcels 1588, 1589	Norfolk Western Rail Road Yard, 5555 and 5506 Wooster Pk.; Regulatory Database Records, SPILLS, ERNS; Visual Concern Due to the Presence of Large AST's,
Parcels 201-205, 209	QCU, Inc.; Neu-Tech Supply, Inc.; Light Source, LTD.; T-Squared Investments - entire building currently vacant, 3727 Jonlen Dr.; No Regulatory Database Records; Visual Concern Due to the Presence of Large AST's,
Parcels 192, 193, 199, 206-208, 211, 212	D & D Metal Supplies Merman Sheet Metal, Inc., 3717 Jonlen Dr.; No Regulatory Database Records, Visual Concern Due to Operation Type and the Presence of Drums,
Parcels 195, 196	American Metal Fabricators, 5574 Wooster Pk.; No Regulatory Database Records, Visual Concern Due to Operation Type,

Wooster Pk. Right-of-Way	Wooster Pk. Roadway Right-of-Way, 5600 Wooster Pk 8600 gal. gasoline spill in roadway from tanker accident; Regulatory Database Record, ERNS; No Visual Concerns at the Time of the On-Site Investigation,
Parcels 270-274	Blind Factory Design Center (5601 Wooster Pk. Identified on Sanborn Maps as former steam laundry and dry cleaners, and in Database Report as Exquisite Cleaners); 5601 Wooster Pk.; Regulatory Database Records, RCRA-SQG, UST, LUST, FINDS; No Visual Concerns at the Time of the On-Site Investigation,
Parcel 275	Morris Automotive Engine and Transmission Repair and Dubwe Rx Automotive Repair - both in same building, 5591 and 5599 Wooster Pk., respectively; Identified on Sanborn Maps as Former Automotive Filling Station; No Regulatory Database Records; Visual Concern Due to Operation Type,
Parcels 93-109, 119-131	Caraustar Mill Group, Inc. / Cincinnati Paperboard Corp. (paper and paper products recycling and manufacturing), 5500 to 5362 Wooster Pk.; Identified on Sanborn Maps as a Paper Mill, Regulatory Database Records, RCRA-CESQG, UST, FINDS, SPILLS, ERNS, ICIS, TRIS, AIRS; Visual Concern Due to Operation Type and the Presence of AST's,
Parcels 334, 387-390	Hafner and Son Top Soil, and Construction and Demolition Landfill, 5445 Wooster Pk.; Regulatory Database Records, UST, LUST, FINDS, SWF/LF; Visual Concern Due to Operation Type and the Presence of AST's, Drums and Landfill Operations,
Parcels 419, 420	Mary's Beer and Balls/Anderson Township Practice Range (bar, pro-shop and driving range), 6520 Batavia Rd., Regulatory Database Record, FINDS; No Visual Concerns at the Time of the On-Site Investigation,
Parcels 1109, 1110	Robbins Sport Surfaces (maple and synthetic sports surfaces manufacturer for basketball, volleyball and athletic and recreational facilities), 3626 Round Bottom Rd.; Regulatory Database Records, RCRA-CESQG, FINDS; No Visual Concerns at the Time of the On-Site Investigation,
Parcel 1111	HAZMAT Environmental Group (3638 Round Bottom Rd. also identified in Database Report as ACE Liquid Waste Haulers), 3638 Round Bottom Rd.; Regulatory Database Records, RCRA-NonGen, RCRA-SQG, FINDS, SPILLS, FTTS, HIST-FTTS, Ind. Haz. Waste; Visual Concern Due to Operation Type and the Presence of AST's,
Parcels 1112, 1113	Forshee Machine Tooling and Construction Company, 3652 Round Bottom Rd.; No Regulatory Database Records; Visual Concern Due to Operation Type,
Parcel 979	Direct Source International (D.S.I., direct merchandise sales facility), 3737 Round Bottom Rd.; Regulatory Database Record, FINDS; No Visual Concerns at the Time of the On-Site Investigation,
Parcels 1114- 1117	Evans/Natorps Landscaping and Garden Center, 3700 Round Bottom Rd.; Regulatory Database Records, FINDS, SPILLS; No Visual Concerns at the Time of the On-Site Investigation,

Parcel 1119	Hydro Systems Co. (steam cleaning equipment manufacturer), 3798 Round Bottom Rd.; Regulatory Database Records, FINDS, ERNS; No Visual Concerns at the Time of the On-Site Investigation,
Parcels 1125	Butch's Towing, Salvage Yard and Bodley Racing Co., 3850 to 3910 Round Bottom Rd located off Edwards Rd.; Regulatory Database Records, SPILLS; Visual Concern Due to Operation Type and the Presence of AST's, Drums, Surface Stains, Damaged Vegetation, Auto and Truck Salvaging Operation,
Parcel 1085	Justice and Young, Inc., Marketing (6925 Valley Ave. identified in Database Report as Gardner Graphics), 6925 Valley Ave.; Regulatory Database Records, RCRA-SQG, FINDS; No Visual Concerns at the Time of the On-Site Investigation,
Parcel 439-448	Little Miami Golf Center (golf course and pro-shop), 3811 Newtown Rd.; Regulatory Database Record, LUST; No Visual Concerns at the Time of the On-Site Investigation,
Parcel 993	Shell Gas Station (3804 Church St. identified in Database Report as Waco Oil Co., Inc., Ameristop Express 801-Shell, Sunoco Service Station, Newtown Shell), 3804 Church St.; Regulatory Database Records, RCRA-NonGen, UST, LUST, FINDS, SPILLS; Visual Concern Due to Operation Type and the Presence of UST's and Petroleum Odors,
Parcel 624	Van Lock (lock manufacturing facility), 6834 Center St.; Regulatory Database Records, RCRA-CESQG, FINDS; No Visual Concerns at the Time of the On-Site Investigation,
Parcel 1093	Hamilton County Engineer Eastern Division Maintenance and Equipment Repair Facility, 3504 Round Bottom Rd.; Regulatory Database Records, UST, LUST, FINDS; Visual Concern Due to Operation Type and the Presence of AST's and Drums,
Parcel 1094	Enquirer Printing Co. and Cincinnati Envelope (7188 Main St. identified in Database Report as DuoTec, Inc.), 7188 Main St.; Regulatory Database Records, RCRA-NonGen, FINDS; Visual Concern Due to Operation Type,
Parcel 1095	Cincinnati Powder Coating and Duct Cleaning Services Environmental and Industrial Cleaning Co. (7202B Main St. identified in Database Report as C&W Equipment Co.), 7202B Main St.; Regulatory Database Records, RCRA-SQG, FINDS; Visual Concern Due to Operation Type and the Presence of AST's and Drums,
Parcel 1095	Propulsion Engineering Boat Repair and Storage, 7202A Main St.; No Regulatory Database Records; Visual Concern Due to Operation Type and the Presence of Drums, and Numerous Old Shipping Containers, Boats and Cars,
Parcel 1096	Rack 7 Paving, Concrete, and Excavation (7204 to 7208 Main St. identified in Database report as Rumpke Container Service, Emery Worldwide, Inc., Emery Transportation), 7204 to 7208 Main St.; Regulatory Database Records, RCRA-SQG, UST, LUST, FINDS, SPILLS; Visual Concern Due to Operation Type,
Parcels 1098, 1099	Brewer Coat Co. Asphalt Plant, 7300 to 7374 Main St./ Batavia Rd.; Regulatory Database Records, RCRA-NonGen, RCRA-CESQG, FINDS; Visual Concern Due to Operation Type and the Presence of AST's and Drums,

Parcels 1100- 1103	Nactech - Barrett Asphalt Plant and Paving Co., 7375 Batavia Rd.; Regulatory Database Records, RCRA-SQG, UST, FINDS, SPILLS, MLTS; Visual Concern Due to Operation Type and the Presence of AST's,
Parcels 1104, 1105	Sardinia Concrete Co., 7380 Batavia Rd.; Regulatory Database Record, FINDS; Visual Concern Due to Operation Type and the Presence of AST's and Many Pieces of Old Equipment Stored at the Site,
Parcel 1145	Newtown Fill Construction and Demolition Landfill, Main St./SR 32 (adjacent to Sardinia Concrete Co.); No Regulatory Database Records; Visual Concern Due to Operation Type and the Presence of AST's, and Landfill Operations,
Parcels 1151- 1154	Burger Farm and Garden, Ice Cream Stand and Nursery, 7849 Main St.; Regulatory Database Record, FINDS; No Visual Concerns at the Time of the On-Site Investigation,
Parcel 1155	Burger Environmental Construction and Demolition Landfill, 7945 Main St.; Regulatory Database Records, SWF/LF, FINDS; Visual Concern Due to Operation Type and the Presence of and Landfill Operations,
Parcel 1144	Valley Asphalt Corporation Asphalt Plant (7940 Batavia Rd. identified in Database Report as Plant #14), 7940 Batavia Rd.; Regulatory Database Record, LUST; Visual Concern Due to Operation Type and the Presence of AST's,
Parcels 1328, 1329	Exxon Mobile/Beechwood Market Gas Station Convenience Store, 3251 Mt. Carmel Rd.; Regulatory Database Record, UST; Visual Concern Due to Operation Type and the Presence of UST's and Petroleum Odors,
Parcels 1332, 1407	BP Gas Station (currently closed, evidence of tank removal - 6 UST's total, all tanks removed in 2005, per BUSTR), 430 Cincinnati-Batavia Rd.; Regulatory Database Records, RCRA-CESQG, UST, FINDS, Visual Concern Due to Operation Type and the Presence of Drums,
Parcels 1359, 1360	High On The Hill (novelty shop), 8683 Batavia Rd.; No Regulatory Database Records; Visual Concern Due to the Presence of Suspected Auto Salvage Operation
Parcels 1363, 1364	Gray's Towing, Autobody Repair and Wrecker Service, 439 Cincinnati-Batavia Pk.; No Regulatory Database Records; Visual Concern Due to Operation Type.

A. Introduction

Background

The Eastern Corridor Segment II/III project involves relocation of SR 32 (combined with new parallel rail transit) between US 50 in Hamilton County and I-275 in Clermont County (see Attachments A and B1 to B17), and is one of several new highway capacity investments to be implemented as part of the Eastern Corridor Multi-Modal Projects (HAM-SR32-0.00, PID 22970; FHWA-OH-EIS-04-02). The Eastern Corridor Multi-Modal Project covers 165 square miles of Cincinnati's eastern suburbs in eastern Hamilton County and western Clermont County, and is following a tiered approach for compliance with requirements of the National Environmental Policy Act (NEPA) and related statutes. Tier 1, completed in 2006, evaluated transportation needs in the Eastern Corridor, identified environmental and community issues, developed preliminary multimodal alternatives, and assessed preliminary costs, benefits, and impacts. Preliminary alternatives developed in Tier 1 were based on a multi-modal framework established by the Eastern Corridor Major Investment Study completed in 2000. The Eastern Corridor Tier 1 Record of Decision (ROD) was issued in June 2006 and identified a set of alternatives that will be evaluated by mode and segment through independent Tier 2 NEPA analyses to determine final location and impacts. The recommended Tier 2 projects, which include Segment II/III (Relocated SR 32), consist of new highway and rail transit implementation segments, expanded bus service and local network improvements. The Tier 1 ROD established that the Tier 2 NEPA evaluation for Segment II/III and Rail Transit Segment 3, both located in the Little Miami River valley, must be conducted under one NEPA document.

Project Status

The new capacity components of the Eastern Corridor Multi-modal Projects, including highway and rail transit, are following the current Ohio Department of Transportation (ODOT) 14-Step Project Development Process (PDP) for Major projects. The Tier 1 work for Segment II/III identified 22 corridor segments that can be combined into 264 different full-length alternatives for a shared SR 32/rail transit corridor between US 50 in Hamilton County and Bells Lane in Clermont County (see Attachments B1 to B17).

Tier 2 for Segment II/III will continue project development consistent with the ODOT PDP and federal NEPA requirements to identify a preferred alternative, corresponding to Major PDP Step 6 (refining feasible alternatives and identifying a preferred alternative), Step 7 (developing the preferred alternative) and Step 8 (environmental clearance). Because of the numerous corridor segments carried over from the initial Eastern Corridor work, the transition from Tier 1 to Tier 2 includes completion of a Conceptual Alternatives Study (completion of PDP Step 5) to identify a manageable number of full-length feasible alternatives to be carried forward into Step 6 evaluation. This Environmental Site Assessment Screening is being prepared in support of the Conceptual Alternatives Study.

Proposed Transportation Improvements

Segment II/III involves consolidating and managing access points to establish relocated SR 32 as a controlled access arterial roadway west of I-275. Segment II/III begins at US 50 near Fairfax in Hamilton County, where it ties into planned improvements in Segment I at Fair Lane (the Red Bank corridor), and ends in Clermont County's Eastgate area, where it ties a ties into planned Segment IV improvements for the I-275/SR 32 interchange (CLE-275-10.15; PID 76289). Proposed improvements in Segment II/III consist of a new interchange at US 50/Red Bank Road, relocated SR 32 with new parallel rail transit, a multi-modal clear span crossing of the Little Miami River, multi-modal transit stations at US 50 and Newtown Road, preservation of a future rail transit corridor for the proposed Eastern Corridor Wasson rail line, and coordination with other modal improvements in the area.

Study Area Setting

The Segment II/III study area includes the communities of Newtown and Shademore, a portion of Anderson Township (including Mount Carmel), and the south edges of the communities of Fairfax and Mariemont (see Attachments A and B1-B17). The area contains a mix of land uses, including residential, commercial and extensive industrial development in Newtown, wooded stream corridor and agricultural land along the Little Miami River to the west and north of Newtown, and wooded uplands with developing residential areas to the south of Newtown and along existing SR 32 between Newtown and the I-275/SR 32 interchange in the Eastgate area. Segment II/III contains a number of recreational and natural areas including a public golf course, ball/soccer fields and other parkland/green space, and the privately owned Horseshoe Bend preserve. Also occurring in the area is extensive gravel mining and industrial development in the Ancor area to the east of Newtown, and active landfills along US 50 to the west of the Little Miami River and along existing SR 32 just east of Newtown. The Segment II/III area is also sensitive for cultural historic and archaeology resources, especially along the Little Miami River floodplain, and in and around Newtown.

Purpose of This Report

This Environmental Site Assessment (ESA) Screening was conducted to ensure that due care was taken in addressing known and potential hazardous materials parcels in the Eastern Corridor Segment II/III study area. This ESA Screening was conducted in accordance with the guidelines outlined by the Ohio Department of Transportation, Office of Environmental Services (ODOT, 1999), to identify any suspect hazardous materials locations located within the Segment II/III study area that may require a Phase I ESA.

Project Physical Setting

Information concerning current land use in the project study area was obtained from mapping prepared for the *Eastern Corridor Land Use Vision Plan* (Meisner and Associates, May 2002). Current land use in the study area is predominantly residential, commercial and industrial with some agricultural crop lands that include several large sod farms located west of Newtown in the Little Miami River 100-year floodplain. Other smaller areas of agricultural land occur along Round Bottom Road and along SR 32 east of Newtown. By rough estimate, agricultural lands (primarily sod farms), comprise about 15 percent of the total project study area (see Attachment B). Dense concentrations of residential and commercial development are located in the communities of Mariemont, Fairfax, Newtown, and Mount Carmel along US 50/Wooster Pike, Red Bank Road, Dry Run Road, Eight-Mile Road and Old SR 74 (see Attachment B). Heavy industrial development is concentrated within the study area along Wooster Pike and Red Bank Road in the City of Fairfax, along SR 32 primarily east of the Village of Newtown, and along Round Bottom Road (see Attachment B). In addition to the large sod farms, the central portion of the study area is occupied by a large construction and demolition landfill and a top soil harvesting operation east of Wooster Pike along the Little Miami River, two other construction and demolition landfill operations east of Newtown along SR 32, and a number of large quarry lakes resulting from aggregate mining operations that are no longer in operation (see Attachment B).

The project study area occurs in the Pre-Wisconsinan Drift Plains of the Eastern Corn Belt Plains Ecoregion. As a whole, this Ecoregion encompasses most of west central and southwest Ohio (extending into Indiana), and is characterized as a rolling glacial till plain, with soils derived from glacial materials, potential natural vegetation consisting of beech-maple hardwood forest, and land use comprised of a combination of agricultural cropland, woodland and small to medium urban areas. Agricultural cropland is the predominant land use in this Ecoregion overall, however, in the Eastern Corridor Segment II/III study area most agricultural land has been cleared for residential, commercial and industrial land uses (USEPA, 2008).

Topography in most of the Segment II/III study area is controlled by glacial deposits and stream erosion. Surface topography in the Segment II/III study area can be characterized as predominantly level to gently sloping in proximity to the Little Miami River, the Village of Newtown, Fairfax, Mariemont and Mount Carmel with steep slopes and valley cuts occurring where the study area transitions out of the Little Miami River 100-year floodplain at the western and eastern ends. Natural surface elevations in the study area range from about 470 feet above mean sea level near the Little Miami River in the western portion of the study area to approximately 900 feet above mean sea level near Mount Carmel in the eastern portion of the study area. The study area is located in the Little Miami River drainage basin (HUC 05090202) and in the Federal Emergency Management Agency (FEMA)-mapped 100-year floodplains of the Little Miami River and Dry Run (ODNR, GIMS, 2008).

B. Historic Aerial Photograph Cursory Review and Findings

Historic aerial photographs were reviewed to determine past land uses, and to aid in identifying potential hazardous material "suspect" locations within the Segment II/III study area. Historic aerial photographs were obtained from the Ohio Department of Transportation Office of Aerial Engineering and included the following years: 1948, 1954, 1959, 1964, 1973, 1976 1981, and 1986 (see Attachment C). Aerial composite photographic mapping of the entire Segment II/III study area was also provided by Stantec for this study and included the following years: 1932, 1938, 1950, 1956, 1962, 1962, 1975, 1977 and 1990 (see Attachment C). A 2007 aerial photograph of the project area and surrounding vicinity was obtained from the Cincinnati Area Geographical Information System (CAGIS) (CAGIS, 2008) and was used for comparison of current conditions (see Attachment B). The 2007 aerial was field-checked during visual investigation of the area to confirm current (2008) conditions.

In general, the aerial photographs show continual developed, residential and commercial land uses concentrated in the Fairfax/Mariemont, Newtown and Mount Carmel areas and relatively unchanged agricultural land use in the portion of the study area between Fairfax/Mariemont and Village of Newtown. Because of the scale and clarity of the aerial photography, exact site usage could not be determined. However, review and comparison of the aerial photographs indicated the presence of generally urbanized, commercial and industrial built-up areas surrounded by agriculture throughout this time period. The exception to this observation was the appearance in the 1940's of the large quarry lakes in the Newtown area along Round Bottom Road, indicating that this portion of the study area was being actively mined throughout this time period. The following is a brief summary of the apparent land use conditions in the project area from 1932 to the present, based on aerial photograph review:

1932-1938 Historic Aerial Photographs

Review of 1932 to 1938 historic aerial photographs indicated that the Segment II/III study area and surrounding vicinity appear to be mostly agricultural with small concentrations of residential development occurring along Wooster Pike/US 50, SR 32 and Old SR 74 in the Fairfax/Mariemont, Newtown and Mount Carmel Areas, respectively. High light reflectivity in the Wooster Pike vicinity would seem to indicate the occurrence of a number of commercial or industrial facilities, as well as gravel pit/quarrying areas. A rail yard was also noted south of Wooster Pike/US 50 south of the Fairfax/Mariemont area.

1948-1950 Historic Aerial Photographs

Review of 1948 to 1950 historic aerial photographs indicated that a number of large commercial or industrial buildings had been constructed along Red Bank Road and Wooster Pike since the time of the 1932 to 1938 aerial photographs. Evidence of gravel pits, quarrying activity were also noted on these aerials by the appearance of quarry ponds and lakes east of Newtown along SR 32 and Round Bottom Road. Evidence of a utility corridor for high tension wires was also noted during this time period crossing the Horse Shoe Bend area of the Little

Miami River. In general, the remaining areas of commercial, industrial and residential development, and areas in agricultural land use, appeared to have remained relatively unchanged during this time period.

1954-1956 Historic Aerial Photographs

Review of 1954 to 1956 historic aerial photographs indicated that the number and size of the gravel pits and quarry lakes along SR 32 and Round Bottom Road increased from the time of the 1948 to 1950 aerial photographs. It was also noted that a number of new streets and what appeared to be residential houses had been constructed along Mount Carmel Road, and in Mount Carmel along Old SR 74. With the exceptions noted above, the remaining areas of commercial, industrial and residential development, and areas in agricultural land use, appeared to have remained relatively unchanged during this time period.

1959-1964 Historic Aerial Photographs

Review of 1959 to 1964 historic aerial photographs indicated what appeared to be new commercial or industrial development along Red Bank Road and Wooster Pike in the Fairfax/Mariemont area, and along SR 32 in proximity to Newtown. It was also noted that more new streets and what appeared to be residential houses had been constructed along Mount Carmel Road, and in Mount Carmel off of Old SR 74. With the exceptions noted above, the remaining areas of commercial, industrial and residential development, and areas in agricultural land use, appeared to have remained relatively unchanged during this time period.

1968-1977 Historic Aerial Photographs

Review of 1968 to 1977 historic aerial photographs indicated that new streets and what appeared to be residences had been constructed east of Red Bank Road since the time of the 1959 to 1964 aerial photographs. Fair Lane and Virginia Avenue, and number of what appeared to be larger commercial or industrial buildings along Fair Lane and Virginia Avenue, had been constructed since the time of the 1959 to 1964 aerial photographs. A number of what appeared to be larger commercial or industrial buildings had also been constructed along Red Bank Road. River Hills Drive was also constructed since the time of the 1959 to 1964 aerial photographs along with a number of what appeared to be industrial or commercial buildings in the Village of Newtown. It was also noted that the number and size of the quarry ponds and lakes increased indicating an increase in quarrying activities along SR 32 and Round Bottom Road east of Newtown. Additional subdivision streets and what appeared to be single family and multi-family residences were constructed during this time in the Mount Carmel area particularly in the vicinity of Mount Carmel Road and Bells Lane. With the exceptions noted above, the remaining areas of commercial, industrial, and residential development, and areas in agricultural land use, appeared to have remained relatively unchanged during this time period.

1981-1990 Historic Aerial Photographs

Review of 1981 to 1990 aerial photographs indicated what appeared to be the construction of larger commercial or industrial buildings along Red Bank Road. What appeared to be a salvage yard and possibly a landfill operation north and south of Wooster Pike, respectively, in the Fairfax area were also noted on these aerial photographs. The number and size of the quarry lakes east of Newtown were noted to have increased since the time of the 1968 to 1977 aerial photographs. What appeared to be a salvage yard and a number of larger commercial or industrial buildings were noted to have been constructed along Edwards Road north of Newtown. A new golf course was noted to have been constructed east of Newtown Road/Church Street since the time for the 1968 to 1977 aerial photographs. Additional subdivision streets and what appeared to be single and multifamily residences had been constructed near Newtown, between Newtown and Mount Carmel along SR 32, along Mount Carmel Road and along Bells Lane. With the exceptions noted above, the remaining areas of commercial, industrial, and residential development, and areas in agricultural land use, appeared to have remained relatively unchanged during this time period.

2007 Aerial Photographs

Review of 2007 aerial photographs, and comparison with the 1932 to 1990 historic aerial photographs, indicated that the commercial, industrial, and residential development, and areas in agricultural land use, noted in the historic aerial photographs, are consistent with the 2007 aerial photograph. With a few exceptions (mostly as a result of continued residential development in the Mount Carmel area) comparison of the 2007 aerial photograph with conditions observed during the visual inspection of the Segment II/III study indicated that the 2007 aerial photograph depicts current (2008) conditions.

C. Sanborn Fire Insurance Maps Review and Findings

The following certified Sanborn Fire Insurance Maps provided by EDR (EDR, 2008) were reviewed for the Eastern Corridor Segment II/III study area: 1904, 1917, 1950, and 1981. Copies of these maps are included in Attachment D. The following is a summary of facilities, features or items of potential concern in the Segment II/III study area as noted on the Sanborn Fire Insurance Maps:

1904 Sanborn Maps

 Parcels 93-109, 119-131 (currently Caraustar Mill Group/Cincinnati Paperboard Corp.), identified as Linwood Water Works Pumping Station.

1917 Sanborn Map

• Parcels 93-109, 119-131 (currently Caraustar Mill Group/Cincinnati Paperboard Corp.), identified as the Charles Bolt Paper Mill.

1950 Sanborn Maps

- Parcel 221 (currently, American Self Storage), identified as Private Truck Repair Facility,
- Parcels 265-268 (currently, Kellogg's Co.), identified as Strietman Biscuit Co. and Bakery,
- Parcels 288-289 (currently Wessels Commercial Co./Beiersdorf, Inc.), identified as Emery Industries, Inc. Candle Manufacturing Co.,
- Parcels 282-286 (currently Cincinnati Gearing Systems), identified as Ilsco Copper Tube and Products Manufacturing Co.,
- Parcels 278-281 (currently Messer Industries/Cincinnati Steel Treating), identified as The Electric Service Co.
 Transformer Manufacturers,
- Parcels 270, 277 (currently Haney Packaging Resource Center), identified as Cincinnati Gear Co. Gear Manufacturers,
- Parcels 271-274 (currently Blind Factory Design Center), identified as Steam Laundry and Dry Cleaning facility,
- Parcel 275 (currently Morris Automotive Engine and Transmission Repair/Dubwe Rx Automotive Repair), identified as Automotive Filling Station,
- Parcels 93-109, 119-131 (currently Caraustar Mill Group/Cincinnati Paperboard Corp.), identified as the Container Corporation of America Manufacturers of Paper Boxes/International Paper, Inc.
- Parcels 355-365 (currently Stephani Landscaping/Neyra Industries), identified as Automotive Repair Garage and a Private Filling Station.

1981 Sanborn Maps

- Parcel 198 (currently Strictly Dogs, Dog Daycare), identified as Plastics Factory and Forging Shop,
- Parcels 214, 215 (currently. Graham Wilson Co. closed facility), identified as a Machine Shop,
- Parcels 216, 222-226, 228 (currently KE Warehousing and Delivery, and The Textile Studio), identified as Broom and Mop Manufacturing Facility
- Parcel 221 (currently, Am. Self Storage), identified as Furniture Store,
- Parcels 265-268 (currently, Kellogg's Co.), identified a Strietman Biscuit Co. and Bakery,
- Parcels 288-289 (currently Wessels Commercial Co./Beiersdorf, Inc.), identified as American Standard Manufacturer of Plumbing and Heating Equipment,
- Parcels 282-286 (currently Cincinnati Gearing Systems), identified as Dorman Products, Inc. Manufacturers
 of Auto Parts,
- Parcels 278-281 (currently Messer Industries/Cincinnati Steel Treating), identified as The Cincinnati Steel Treating Co.,
- Parcels 270, 277 (currently Haney Packaging Resource Center), identified as Cincinnati Gear Co. Gear Manufacturer,
- Parcels 271-274 (currently Blind Factory Design Center), identified as Steam Laundry and Dry Cleaning facility,
- Parcel 275 (currently Morris Automotive Engine and Transmission Repair/Dubwe Rx Automotive Repair), identified as Automotive Filling Station,
- Parcels 93-109, 119-131 (currently Caraustar Mill Group/Cincinnati Paperboard Corp.), identified as the Container Corporation of America Manufacturers of Paper Boxes,
- Parcels 355-365 (currently Stephani Landscaping/Neyra Industries), identified as Automotive Repair Garage and a Private Filling Station.

As noted above, review of Sanborn Fire Insurance Maps indicated the presence of a number of facilities of potential concern in the Eastern Corridor Segment II/III study area that were also identified during the on-site visual investigation and the Regulatory Database Search as having hazardous materials concerns (see ESA Screening Checklists for all facilities of concern in Attachment H).

Review of the 1904-1981 Sanborn Fire Insurance maps indicated that the G. Graham Wilson Company (currently closed, with no visual or Regulatory Database evidence of hazardous materials concerns) was noted on the 1981 Sanborn Fire Insurance Maps as being a Machine Shop. As a result of this finding, the G. Graham Wilson Company facility (parcels 214, 215) was determined to be an historic hazardous materials concern. An ESA Screening Datasheet and photograph for this facility are included in Attachments H and I, respectively, and detailed information for this facility is presented in Table 1 in Section H on page 15.

D. Historic USGS Maps Review and Findings

The following historic USGS maps provided by EDR were reviewed for the project: 1900, 1914, 1953, 1955, 1961, 1970, 1974, 1979, 1981, 1983, 1992 and 1996 (EDR, 2008). Copies of historic USGS maps are included in Attachment E. The following is a brief summary of conditions in the Segment II/III study area from 1900 to 1996, based review of historic USGS maps:

1900-1914 Historic USGS Maps

Review of historic 1900-1914 USGS maps indicated the presence of a number of structures in the Segment II/III study area, predominantly in the Newtown and Mount Carmel areas.

1953-1955 Historic USGS Maps

By 1953 to 1955, a grid pattern of blocks and streets with a Red Tint Overprint appeared in the Fairfax/Mariemont area identifying this as an urban area. The shapes of large buildings were also noted along Red Bank Road and Wooster Pike. A grid pattern of blocks and streets with additional structures (mostly small and likely residential given observations noted during the visual inspection) were also noted in the Newtown area and along the Little Miami River in the Shademore development. A number of small structures were also noted along SR 32 and Round Bottom Road east of Newtown, and along Old SR 74 in the Mount Carmel area. Gravel pits and quarrying activities were also present on the 1953 to 1955 USGS maps along Red Bank Road and Wooster Pike, and east of Newtown along SR 32 and Round Bottom Road. A utility line corridor is also present on these USGS maps bisecting the Horse Shoe Bend area of the Little Miami River.

1961 Historic USGS Maps

By 1961 the Red Tint Overprint in the Fairfax/Mariemont area, and the number of large structures had increased, especially along Red Bank Road and Wooster Pike. Virginia Avenue appeared on the 1961 maps adjacent to several moderate-sized structures. More small structures appeared in the Newtown area and several larger ones appeared along SR 32. The gravel pits and quarry ponds/lakes in the Newtown vicinity were noted to have increased in size from the time of the 1953 to 1955 USGS maps. Also, the number of small structures was noted to have increased in the vicinity of Mount Carmel along Mount Carmel Road and Bells Lane.

1970-1979 Historic USGS Maps

By 1970 to 1979, Fair Lane appeared on the USGS maps. The number of larger structures was also noted to have increased in the vicinity of Fair Lane, with new structures appearing along Fair Lane, Virginia Avenue and Red Bank Road. Additional streets and small structures (most likely residential given observations noted during the visual inspection) were also noted in the area west of Red Bank Road. Gravel mining and quarrying activities were also noted to have expanded along SR 32, Round Bottom Road and Dry Run Road east of Newtown. In the vicinity of Mount Carmel, the number of small to moderate sided structures (most likely single and multifamily residential given observations noted during the visual inspection) were also noted to have increased, especially along Mount Carmel Road, Old SR 74 and Bells Lane. A Red Tint Overprint was also noted in the Mount Carmel Area for the first time in 1979 indentifying this as an urbanized area.

1981-1996 Historic USGS Maps

From 1981 to 1996, additional large buildings were observed along Round Bottom Road and the gravel mining and quarrying activities were observed to have expanded since the time of the 1970 to 1979 historic USGS maps. Some additional large structures were also noted in the Newtown area south of SR 32. The number of small and large structures was observed to have increased in the Mount Carmel area and the Red Tint Overprint area had expanded to include most of Mount Carmel, and the areas along Mount Carmel Road and Bells Lane, identifying this as an urbanized area.

E. Regulatory Database Review and Findings

Hazardous materials or wastes are defined as "substances which are regulated as hazardous or toxic by the United States Environmental Protection Agency" (USEPA). Within this definition, most hazardous substances exhibit one or more of the following characteristics: ignitability, corrosivity, reactivity, or toxicity. Suspect properties include (but are not limited to): gas stations, dry cleaners, photo processors, paint stores, auto repair

shops, metal fabricators, most industrial manufacturing plants, junkyards, and any other establishments which use or dispose of chemicals or solvents.

An environmental records database search was conducted by Environmental Data Resources Incorporated (EDR, 2008) for the project area on August 26, 2008 (see Attachment F). The listings in the regulatory database provide information on registered and identified potential hazardous material/waste parcels in the Segment II/III study area. This database search covered up to a ½ mile buffer surrounding the Segment II/III study area, and targeted solid waste landfills, registered and/or leaking underground storage tanks, regulated and unregulated hazardous waste parcels, and hazardous substance activities and/or petroleum spills. The EDR database review included a search of approximately 60 Federal, State and local American Society of Testing and Materials (ASTM) and non-ASTM databases, as follows:

Federal Database Records:

- NPL, National Priority List
- Proposed NPL, Proposed National Priority List Sites
- Delisted NPL, National Priority List Deletions
- NPL LIENS, Federal Superfund Liens
- CERCLIS, Comprehensive Environmental Response, Compensation, and Liability Information System
- CERCLIS-NFRAP, CERCLIS No Further Remedial Action Planned
- CORRACTS, Corrective Action Report
- LIENS 2, CERCLA Lien Information
- RCRA-LQG, Resource Conservation and Recovery Act (RCRA) Large Quantity Generator
- RCRA-SQG, RCRA Small Quantity Generator
- RCRA-CESQG, RCRA Conditionally Exempt Small Quantity Generator
- RCRA-TSDF, RCRA Transportation Storage Disposal Facility
- RCRA-NonGen, RCRA Non-Generator
- ERNS, Emergency Response Notification System
- HMIRS, Hazardous Materials Information Reporting System
- US ENG CONTROLS, Engineering Controls Sites List
- US INST CONTROL, Sites with Institutional Controls
- DOD, Department of Defense Sites
- FUDS, Formerly Used Defense Sites
- US BROWNFIELDS, A Listing of Brownfields Sites
- CONSENT, Superfund (CERCLA) Consent Decrees
- ROD, Records Of Decision
- UMTRA, Uranium Mill Tailings Sites
- ODI, Open Dump Inventory
- TRIS, Toxic Chemical Release Inventory System
- TSCA, Toxic Substances Control Act
- FTTS, Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA)/Toxic Substances Control Act Tracking System
- FTTS-INSP, FIFRA/TSCA Inspections and Enforcements
- HIST-FTTS, Tracking System Administrative Case Listing
- HIST-FTTS-INSP, Tracking System Inspection and Enforcement Case Listing

- SSTS, Section 7 Tracking Systems
- DOT OPS, Incident and Accident Data
- LUCIS, Land Use Control Information System
- ICIS, Integrated Compliance Information System
- RADINFO, Radiation Information Database
- US CDL, Clandestine Drug Labs
- DEBRIS REGION 9, Torres Martinez Reservation Illegal Dump Site Locations
- PADS, PCB Activity Database System
- MLTS, Material Licensing Tracking System for possession or use of radioactive materials
- MINES, Mines Master Index File
- FINDS, Facility Index System/Facility Registry System
- RAATS, RCRA Administrative Action Tracking System
- BRS, Biennial Reporting System

State, Tribal and Local Database Records:

- SHWS, This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list
- SWF/LF, Licensed Solid Waste Facilities
- LUST, Department of Commerce Bureau of Underground Storage Tank Regulations database of Leaking Underground Storage Tanks
- UST, Department of Commerce BUSTR database of Underground Storage Tanks
- SPILLS, OEPA Emergency Response Database
- INST CONTROL, Sites with Institutional Engineering Controls
- VCP, Voluntary Action Program Sites
- DRYCLEANERS, A listing of drycleaner facility locations
- BROWNFIELDS, Ohio Brownfield Inventory
- AIRS, Title V Permits Listing
- INDIAN RESERV, Indian Reservations
- INDIAN ODI, Report on the Status of Open Dump on Indian Lands
- INDIAN LUST, Leaking Underground Storage Tanks on Indian Land
- INDIAN UST, Underground Storage Tanks on Indian Land
- INDIAN VCP, Voluntary Cleanup Priority Listing on Indian Lands

EDR Proprietary Records:

Manufactured Gas Plants

Other Databases:

• CT, NJ, NY, PA, RI, VT, WI MANIFEST, Connecticut, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin hazardous waste manifest information.

The regulatory database records search identified a total of 62 facilities, and one ERNS site on Wooster Pike, with regulatory records of hazardous materials activities in the Eastern Corridor Segment II/III study area (30 of which also had visual evidence of hazardous materials concerns as further discussed in Section F, below). ESA Screening Datasheets and photographs for these facilities are included in Attachments H and I, respectively

(datasheet only for the one ERNS site on Wooster Pike), and detailed information is presented in Table 1 in Section H on page 15.

F. Visual Inspection

A walk-over visual inspection was performed in October 2008 on all 1,589 parcels that occur in the Eastern Corridor Segment II/III study area (see table of parcels investigated for this ESA Screening in Attachment G). Of these 1,589 parcels, a total of 58 facilities (most facilities comprised of multiple parcels) were determined to have visual evidence of hazardous materials concerns (32 of which also had Regulatory Database records indicating the presence or occurrence of hazardous materials, as discussed in Section E, above). Detailed information concerning the 58 facilities with visual evidence of hazardous materials concerns is provided in Table 1 in Section H on page 15, and on ESA Screening Checklists and in photographs included in Attachments H and I, respectively.

Also, during the October 2008 visual inspection, no suspect conditions were noted with any electrical equipment (transformers, capacitors) within the Segment II/III study area.

Given the extent of the Segment II/III study area and the amount of area located on private property unavailable for thorough visual inspection, a more detailed visual investigation of individual suspect parcels is recommended for any preliminary alternative chosen for further development.

G. Oil and Gas Wells

Review of information from the Ohio Department of Natural Resources Emergency Response System (ODNR-ERS) (ODNR-ERS, 2008) indicated that no oil or gas wells are located in the project area or the immediate project vicinity.

H. Conclusions and Recommendations

Through on-site visual inspection and a review of historic aerial photographs and USGS maps (noting the absence, presence, and/or removal, and changes/variations in the size and/or shape of structures on parcels), Sanborn Fire Insurance Maps, and Regulatory Database search information, a total of 88 facilities and one ERNS spill site (on approximately 213 study area parcels) were determined to have hazardous materials concerns as summarized in Table 1 on page 15. Of these, 40 facilities and the one ERNS site (on approximately 119 study area parcels) occur within or immediately adjacent to the preliminary alternative corridors currently under consideration for this project, and are recommended for further study at this time. The 41 total facilities/sites recommended for further study are summarized below, and in Table 1 on page 14.

Parcel 146

Reinforced Concrete Frame.

- Reinforced Concrete Joists, Columns, Beams, В. Trusses, Arches, Masonry Piers.
- Protected Steel Frame.
- Individually Protected Steel Joists, Columns, Beams, Trusses, Arches.
- Indirectly Protected Steel Frame.
- Indirectly Protected Steel Joists, Columns, Beams, Trusses, Arches. Unprotected Steel Frame.
- $\dot{\rm U}$ nprotected Steel Joists, Columns, Beams, Trusses, Arches.
- Masonry Bearing Walls.
- The coding for framing, floor and roof structural units as shown above is used in describing the construction of fire-resistive buildings. In addition, reports for fire-resistive buildings will show the date built and wall construction when other than brick.

 FP buildings have masonry floors and roof; concrete and/or directly or indirectly protected steel framing and clay brick, stone or poured concrete unit.

- rete walls

 FPX buildings are FP buildings with inferior walls such as concrete
 block, cement brick, metal or glass panels, etc.

 NC buildings have unprotected steel framing and fire-resistive but nonmasonry floors and roof.

- Reinforced Concrete. Reinforced Concrete with Masonry Units. Pre-cast Concrete or Gypsum Slabs or Planks. Concrete on Metal Lath,
- Incombustible Form Boards,
 Paper-backed Wire Fabric, Steel Deck, and Cellular, Ribbed or Corrugated Steel Units.
- Open Steel Deck or Grating.

The EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/25/2008 has revealed that there is 1 CORRACTS site within the searched area.

Site	Address	Map ID	Page
CINCINNATI STEEL TREATING CO	5701 MARIEMONT AVE	5	<i>55</i>

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 05/12/2008 has revealed that there are 2 RCRA-LQG sites within the searched area.

Site	Address	Map ID	Page

VIVI-COLOR INC *	665 CINCINNATI-BATAVIA	29	232

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 05/12/2008 has revealed that there are 18 RCRA-SQG sites within the searched area.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 05/12/2008 has revealed that there are 14 RCRA-CESQG sites within the searched area.

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 05/12/2008 has revealed that there are 18 RCRA-NonGen sites within the searched area.

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 07/12/2008 has revealed that there is 1 FTTS site within the searched area.

Site	Address	Map ID	Page
HAZMAT ENVIORMENTAL GROUP INC	3638 ROUND BOTTOM RD	19	173

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there is 1 HIST FTTS site within the searched area.

Site	Address	Map ID	Page
HAZMAT ENVIORMENTAL GROUP INC	3638 ROUND BOTTOM RD	19	173

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

A review of the ICIS list, as provided by EDR, and dated 04/24/2008 has revealed that there are 11 ICIS sites within the searched area.

MLTS: The Material Licensing Tracking System is maintained by the Nuclear Regulatory Commission and contains a list fo approximately 8,100 sites which possess or use radioactive materials and are subject to NRC licensing requirements.

A review of the MLTS list, as provided by EDR, and dated 07/08/2008 has revealed that there is 1 MLTS site within the searched area.

Site	Address	Map ID	Page
BARRETT PAVING MATERIALS, INC.	7374 MAIN STREET	23	202

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/01/2008 has revealed that there are 90 FINDS sites within the searched area.

AIRS: A listing of Title V Permits issued by the Division of Air Pollution Control. It is a federal operating permit program adopted and implemented by the state. The basic program elements typically specify that major sources will submit an operating application to the specified state environmental regulatory agency according to a schedule.

A review of the AIRS list, as provided by EDR, and dated 07/08/2008 has revealed that there is 1 AIRS site within the searched area.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Other Pertinent Environmental Activity Identified at Site

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also

EDR ID Number

has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: X001

Waste name: WASTE OILS

U.S. importer of hazardous waste: Nο Mixed waste (haz. and radioactive): No Recycler of hazardous waste: No Transporter of hazardous waste: No Treater, storer or disposer of HW: No Underground injection activity: No On-site burner exemption: No Furnace exemption: No Used oil fuel burner: No Used oil processor: Nο User oil refiner: No Used oil fuel marketer to burner: No Used oil Specification marketer: No Used oil transfer facility: No Used oil transporter: Nο

Off-site waste receiver: Commercial status unknown

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008 Waste name: LEAD

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F001

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED

FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED

IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE

Other Pertinent Environmental Activity Identified at Site

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly

Map ID

1000163768

EDR ID Number

shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Classification: Conditionally Exempt Small Quantity Generator

Description: Handler: generates 100 kg or less of hazardous waste per calendar

month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from

the cleanup of a spill, into or on any land or water, of acutely

hazardous waste

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011
Waste name: SILVER

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Off-site waste receiver: Commercial status unknown

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is

Off-site waste receiver: Commercial status unknown

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans

to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Other Pertinent Environmental Activity Identified at Site

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/30/2008 Source: EPA
Date Data Arrived at EDR: 05/06/2008 Telephone: N/A

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994

Number of Days to Update: 56

Telephone: 202-564-4267 Last EDR Contact: 08/18/2008

Next Scheduled EDR Contact: 11/17/2008 Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/09/2008 Date Data Arrived at EDR: 07/22/2008 Date Made Active in Reports: 08/25/2008

Next Scheduled EDR Contact: 09/15/2008 Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 05/12/2008 Date Data Arrived at EDR: 06/13/2008 Date Made Active in Reports: 08/08/2008

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 05/12/2008 Date Data Arrived at EDR: 06/13/2008 Date Made Active in Reports: 08/08/2008

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995

STATE AND LOCAL RECORDS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Next Scheduled EDR Contact: 10/06/2008 Data Release Frequency: Annually

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Child Day Care Facilities Source: Department of Job & Family Services

Telephone: 614-466-6282

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory Source: Department of Natural Resources Telephone: 614-265-1044

EDR Site Report™

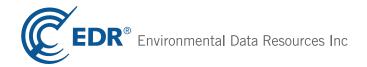

TABLE OF CONTENTS

The EDR-Site Report[™] is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section	on 1: Facility Summary
	Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.
Section	on 2: Facility Detail Reports
	All available detailed information from databases where sites are identified.
Section	on 3: Databases and Update InformationPage 7
	Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

EDR Site Report™

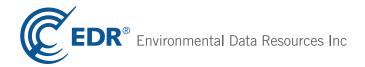

TABLE OF CONTENTS

The EDR-Site Report[™] is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section	on 1: Facility Summary
	Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.
Section	on 2: Facility Detail Reports
	All available detailed information from databases where sites are identified.
Section	on 3: Databases and Update InformationPage 7
	Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.
